SSC CGL

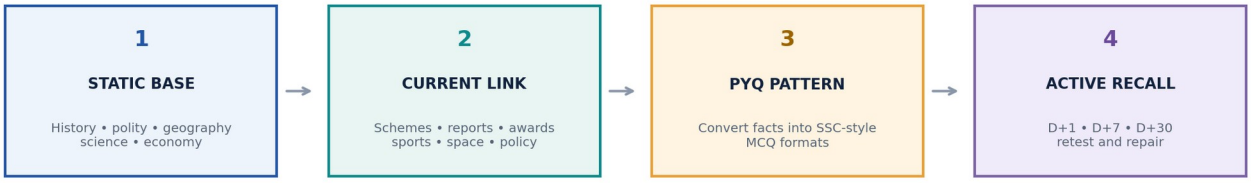

GENERAL AWARENESS + CURRENT AFFAIRS

MASTER SYLLABUS & STUDY OPERATING SYSTEM

A priority-led, history-informed syllabus for Tier-I and Tier-II. Built to be reused as a reference manual, checklist and study planner.

25 Q	25 Q	6–12 mo
Tier-I | 50 marks	Tier-II GA | 75 marks	CA capture window (recommended)

The repeatable GK learning engine

The central strategy

Build static knowledge first; connect it to relevant current events; practise authentic previous-year questions; then use spaced recall to retain facts. This is a study framework, not an official SSC weightage formula.

Prepared 30 October 2026 | For personal study and reusable classroom planning

1. Official exam map: Tier-I vs Tier-II

SSC calls this section General Awareness. It tests awareness of the surrounding environment and society, current events, everyday scientific understanding, and India plus neighbouring countries—particularly history, culture, geography, economic scene, general policy and scientific research. [1]

Exam stage	Questions / marks	Time	Scoring / interpretation
Tier-I General Awareness	25 / 50	15-minute sectional timer	−0.50 per wrong answer. Breadth and rapid recall matter.
Tier-II Paper-I, Section-II, Part B: General Awareness	25 / 75	20-minute sectional timer within the 60-minute English + GA section	−1 per wrong answer in Tier-II Paper-I objective sections. GA carries 3 marks per question.

Do not confuse these two formats

Tier-II GA is not a separate full-length GK paper. In the 2026 scheme, it is 25 questions / 75 marks with a 20-minute timer alongside English in Section-II. Always verify the notice for the recruitment cycle you are sitting.

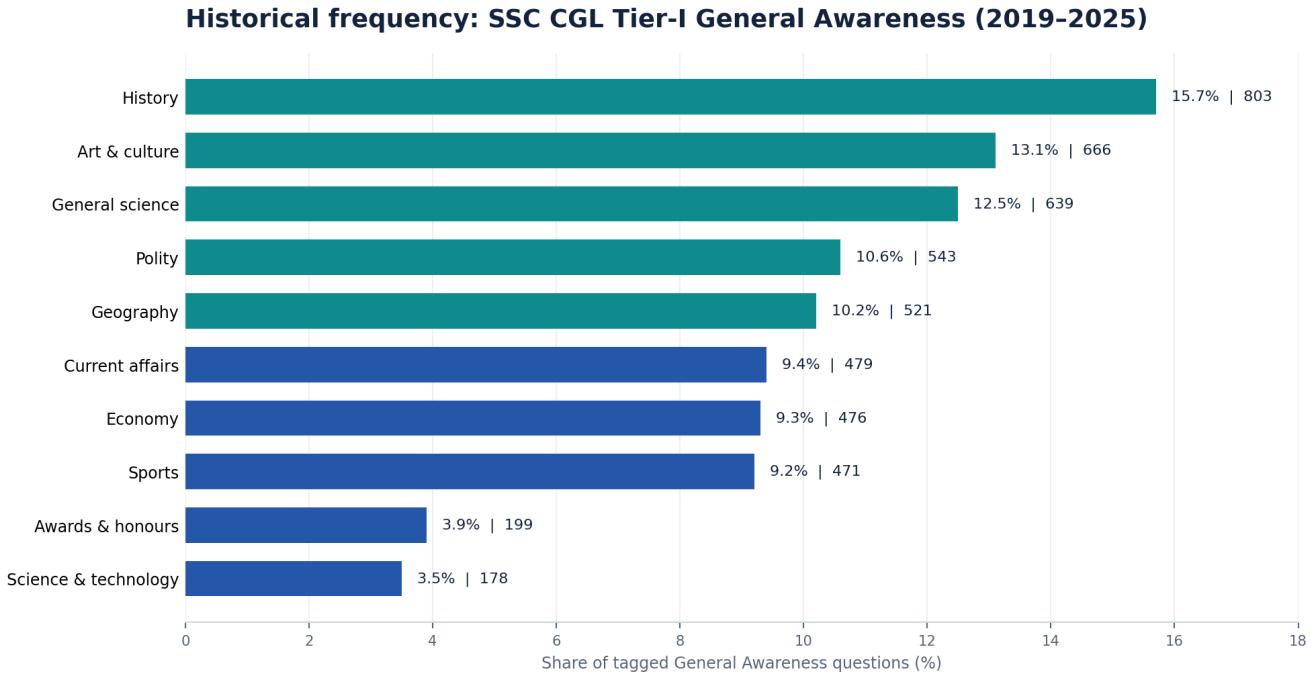

Official scope translated into study areas

- History and culture: ancient, medieval and modern India; reform movements, freedom struggle, art, heritage and traditions.
- Geography: India and world geography, physical features, rivers, climate, agriculture, resources and neighbouring countries.
- Economic scene: basic economics, banking, inflation, budget, policy, institutions and major schemes.
- General policy: Constitution, Parliament, executive, judiciary, governance, constitutional bodies and public programmes.
- Scientific research and everyday science: school-level physics, chemistry, biology, environment, space and technology.
- Current events: nationally and internationally significant events, awards, sports, appointments, reports and policy announcements.

Authority: SSC CGL 2026 official notification, indicative syllabus and examination scheme, sections 13.8, 13.9, 13.10.2 and 13.11.4. [1]

2. Historical topic patterns: what deserves early attention?

A third-party analysis of 204 SSC CGL papers from 2019–2025 reports 5,100 tagged General Awareness questions. Its largest topic categories are History, Art & Culture, General Science, Polity and Geography. [2]

Historical category	Questions counted	Share reported
History	803	15.7%
Art & culture	666	13.1%
General science	639	12.5%
Polity	543	10.6%
Geography	521	10.2%
Current affairs	479	9.4%
Economy	476	9.3%
Sports	471	9.2%

How to interpret this graph

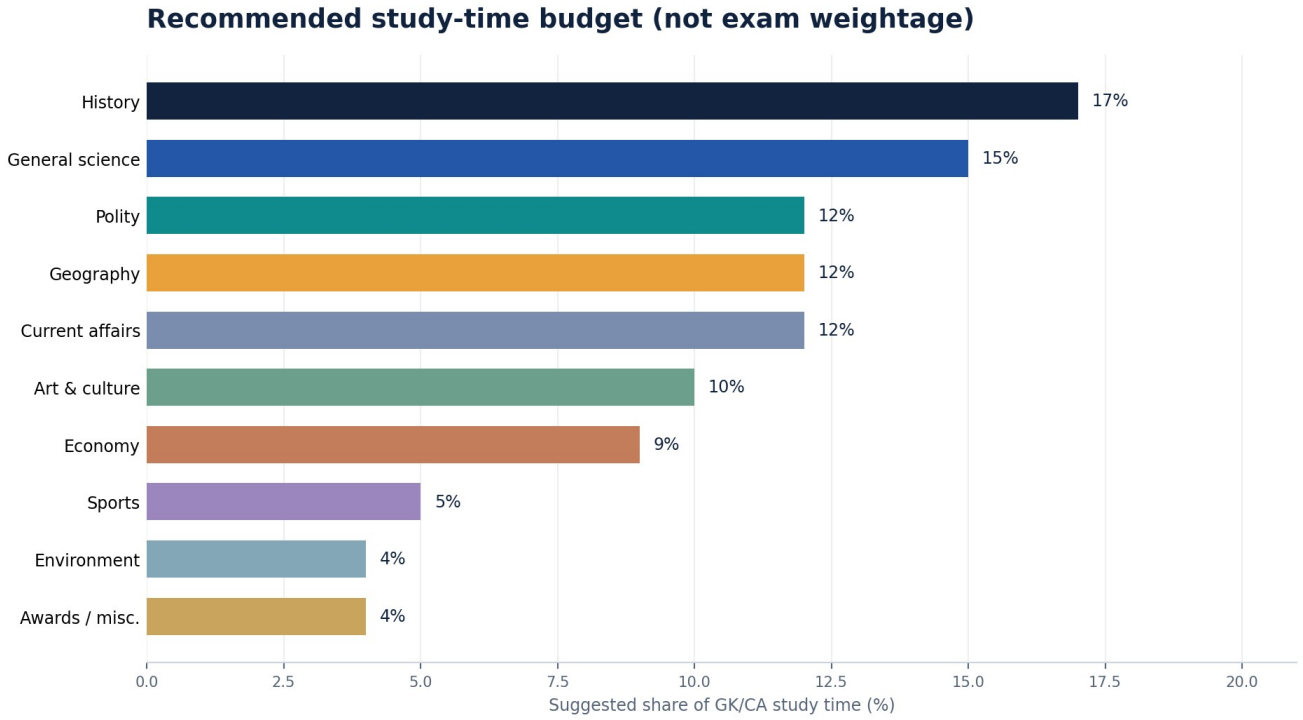

This is third-party tagging of past papers, not an SSC-published weightage table. Topic classification can differ between providers, question mix shifts across years and shifts, and past frequency does not guarantee future questions. Use it to prioritise study time—not to predict an exact number of questions.

The first five categories together represent about 62.1% of the reported GA questions in this dataset. This is a compelling reason to give static subjects a stable, recurring place in your timetable while keeping current affairs active throughout preparation. [2]

3. Priority architecture: study sequence and time allocation

The preparation order should be different from a textbook index. Study the subjects that repeatedly unlock other subjects first, then spread time across all syllabus families.

Priority	What it means	Topics
P0: Build first	Reusable static base	Modern history timeline; constitutional basics; Indian geography/map; basic science; core economics terms.
P1: High historical frequency	Main scoring core	History; art and culture; general science; polity; geography.
P2: Recurring current / factual groups	Keep in a rolling cycle	Current affairs; economy; sports; awards; science & technology; environment.
P3: Breadth completion	Do not leave empty	Neighbouring countries, organisations, reports/indices, books/authors, important days and static GK miscellany.

The allocation in the chart is a recommended use of study time, not exam weightage. Adjust it every two weeks using your PYQ accuracy and mock-test misses.

4. History: high-priority static core

History is the highest-frequency single category in the cited 2019–2025 analysis. Use a timeline and cause–event–person–outcome links rather than memorising disconnected facts. [2]

Submodule	Complete checklist	Priority / method
Ancient India	Indus Valley sites and features; Vedic period; Mahajanapadas; Buddhism and Jainism; Maurya, Ashoka and Gupta; Sangam literature; ancient trade, science and learning centres.	P1. Use era timelines, site-location maps and ruler–achievement cards.
Medieval India	Delhi Sultanate; Mughal rulers and administration; Bhakti and Sufi movements; Vijayanagara; regional kingdoms; Marathas; medieval architecture and literature.	P1. Compare rulers, policies, architecture and chronology.
Modern India	European trading companies; expansion of British rule; Governor-Generals / Viceroys; Revolt of 1857; reform movements; Congress; Swadeshi; Gandhian movements; revolutionary activity; constitutional developments; independence and partition.	P1. Highest revision density. Build year–event–leader–place–result chains.
Reform and freedom struggle	Brahmo Samaj, Arya Samaj, Prarthana Samaj, Aligarh movement; major reformers; Congress sessions; acts and commissions; movements and their leaders/locations.	P1. Study by comparison tables and cause-effect.
Historical facts	Books and authors; inscriptions; travellers; ancient universities; dynasties and capitals; important battles and treaties.	P2/P3. Use flashcards; prioritise details appearing in PYQs.

History recall template

Event / movement	When & where	Key person(s)	Why it mattered	PYQ / error note
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____

Efficient history note rule

One fact card should answer one question. For an event, record the date or period, leader, location, objective and result only when relevant. Do not rewrite entire chapters as notes.

5. Art, Culture and Polity

A. Art and culture

Topic cluster	What to cover	Recall technique
Dance and performance	Classical dances and associated states; folk dances; theatre and puppetry; festivals; major performers.	Pair: art form -> state / region / community.
Music	Hindustani and Carnatic basics; instruments; vocal / instrumental categories; notable musicians and gharanas when relevant.	Pair: instrument / style -> feature / artist.
Architecture and visual art	Temple styles; Buddhist and Jain architecture; Sultanate and Mughal architecture; caves; sculpture; painting schools.	Use image cards and feature comparisons.
Literature and heritage	Ancient texts; major languages; classical literature; cultural institutions; UNESCO heritage and related updates.	Link: work -> author / language / period.

B. Indian polity and governance

Chapter	Checklist
Constitution foundation	Historical background; Constituent Assembly; Preamble; salient features; Union and its territory; citizenship basics.
Rights and duties	Fundamental Rights; Directive Principles; Fundamental Duties; key writs and constitutional principles.
Union government	President, Vice-President, Prime Minister, Council of Ministers, Parliament, legislative procedure, budget and parliamentary committees.
State and local government	Governor, Chief Minister, state legislature, Centre–State relations, Panchayati Raj and municipalities.
Judiciary and constitutional bodies	Supreme Court, High Courts, judicial review, Election Commission, CAG, Finance Commission, UPSC and other constitutional/statutory bodies.
Constitutional change and governance	Schedules, important amendments, emergency provisions, anti-defection, elections, major laws and government schemes when relevant.

Avoid the Article-number trap

Learn core Articles, Schedules and Amendments in context, then validate every detail against a trusted source. Do not try to memorise every Article number before you understand the constitutional structure.

6. Geography: map-first preparation

Geography is easier to retain when every fact has a location. Keep a blank India map and a simple world map in your study notebook.

Geography block	Syllabus checklist	Best practice output
Physical geography	Earth structure; latitude/longitude; rotation/revolution; landforms; mountains; plateaus; plains; earthquakes/volcanoes; atmosphere and climate.	Map labels + short concept cards.
Indian geography	Himalayas; plains; peninsular plateau; coastal plains; islands; river systems; lakes; dams; soils; monsoon; cyclones; natural vegetation.	Map each river, dam, state and physical feature.
Economic geography	Crops and crop seasons; irrigation; minerals; energy resources; industries; ports; transport corridors; population and settlement patterns.	State -> crop/resource/industry links.
Environment and conservation	National parks; wildlife sanctuaries; biosphere reserves; Ramsar wetlands; species; protected areas; pollution; climate change and biodiversity.	Location + state + ecosystem + related current update.
World and neighbours	Continents/oceans; major rivers, mountains, deserts, seas, straits and canals; neighbouring countries, capitals, currencies, bordering regions and key institutions.	Map quiz twice a week.

Map routine (10 minutes, twice weekly)

- Day 1: label 10 Indian features from memory; check against an atlas.
- Day 2: label 10 world / neighbouring-country features; add one current event to a location.
- End of week: redraw missed locations without looking.

7. General Science I: Physics and Chemistry

General Science contributes a large share of historical General Awareness questions. For SSC, the best return usually comes from understanding school-level principles and their everyday applications—not advanced specialist theory. [2]

A. Physics

Cluster	Checklist	Question pattern
Units and measurement	SI units, derived units, instruments, scalar/vector basics, measurement and common conversions.	Unit–quantity matching.
Motion and force	Speed/velocity/acceleration basics; Newton's laws; momentum; friction; gravitation; pressure; work, power and energy.	Definition, unit and daily-life application.
Heat and sound	Temperature vs heat; transfer of heat; expansion; waves; frequency; pitch; loudness; echoes and sound travel.	Concept comparison and simple applications.
Light and optics	Reflection, refraction, mirrors, lenses, dispersion, human eye, common optical phenomena.	Image/phenomenon -> rule.
Electricity and magnetism	Current, voltage, resistance, circuit basics; conductors/insulators; electrical power; magnets and electromagnets.	Units, devices, everyday safety.
Everyday physics	Pressure, buoyancy, levers and simple machines, household appliances and technology principles.	Principle -> real-world use.

B. Chemistry

Cluster	Checklist
Matter and atoms	States of matter; elements, compounds and mixtures; atoms/molecules; atomic number and mass basics; periodic table trends at school level.
Reactions	Physical vs chemical changes; oxidation/reduction basics; combustion; corrosion; catalysts; balancing simple reactions.
Acids, bases and salts	Indicators, pH, neutralisation, common salts and everyday applications.
Metals and non-metals	Properties, reactivity, alloys, extraction ideas, corrosion prevention.
Chemistry in everyday life	Common gases, fuels, fertilizers, soaps/detergents, polymers, food chemistry and environmental effects.
Symbols and formulas	Frequently encountered elements, chemical symbols, common compounds and formula recognition.

8. General Science II: Biology, health and environment

A. Biology and human body

Cluster	Checklist	Recall anchors
Cell and basic life science	Cell structures; plant vs animal cell; tissue and basic classification; cell division at introductory level.	Part -> function.
Human body systems	Digestive, respiratory, circulatory, excretory, nervous, endocrine, skeletal and reproductive systems.	Organ -> function -> key substance.
Nutrition and health	Vitamins/minerals, deficiency disorders, balanced diet, enzymes and hormones at school level.	Nutrient -> function -> deficiency.
Diseases and microbes	Bacteria, viruses, fungi and protozoa; common infectious/non-infectious conditions; transmission and prevention.	Agent -> disease -> prevention.
Plant biology	Photosynthesis, respiration, transport, plant hormones, reproduction, pollination and seed dispersal.	Process -> input/output.
Genetics and ecology	Heredity basics; genes/chromosomes; food chains/webs; producers/consumers; ecosystem relationships.	Term -> short definition.

B. Environment and ecology

- Ecosystem structure, food chains, trophic levels, biodiversity, endemic/endangered species and conservation.
- Air, water, soil and noise pollution; waste; renewable/non-renewable energy; greenhouse effect and ozone basics.
- Protected areas, national parks, biosphere reserves, Ramsar sites and key conservation programmes.
- Climate and biodiversity agreements, environment days and major reports when current or frequently linked with India.
- Link static ecology concepts to current affairs: location, species, ministry, convention, report and year.

High-yield science method

Use a two-column notebook: “concept / why” on the left and “PYQ fact or application” on the right. Revisit wrong answers; do not simply highlight a textbook page.

9. Economy: concepts before headlines

Treat economic current affairs as applications of a static foundation. If you understand inflation, fiscal policy, banking and GDP, many news facts become easier to place and remember.

Cluster	Checklist	Static -> current link
Economic basics	GDP/GVA/GNP basics; national income; sectors; growth; development; per-capita measures; poverty; unemployment; inequality.	Understand the measure before memorising a reported figure.
Prices and markets	Inflation, CPI/WPI basics, demand/supply, price indices, repo-linked transmission and purchasing power.	Static definition + most recent relevant update.
Government finance	Union Budget, receipts/expenditure, fiscal deficit, revenue deficit, public debt, taxation and GST basics.	Know what the metric means; use current numbers only from official budget documents.
Banking and RBI	RBI role, monetary policy, repo/reverse repo where applicable, CRR/SLR, banks, payments, financial inclusion and regulation basics.	RBI update + concept card.
Agriculture and industry	Agricultural output/support-price concepts, manufacturing, services, infrastructure, trade, exports/imports and employment.	Major schemes and policy changes.
Institutions and schemes	NITI Aayog; IMF, World Bank, WTO, ADB and other major institutions; centrally significant schemes and responsible ministries.	Mandate -> headquarters -> India link where useful.

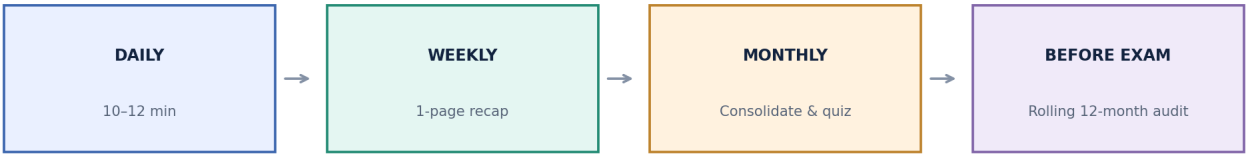

Budget and economic-survey checklist

- Study the economic terms and broad policy direction first.
- Record high-salience numbers only when they are repeatedly highlighted in official summaries.
- Connect a scheme to its ministry, target beneficiaries, objective and one distinctive feature.
- Avoid trying to memorise every table, allocation or statistic in a long report.

10. Current affairs: the rolling capture system

The SSC does not prescribe a fixed “last 6 months only” window. Recommended approach: maintain a rolling 12-month collection window, give the most recent 6 months the highest revision intensity, and retain older items selectively when nationally important or connected to static syllabus concepts.

Current affairs: a rolling system, not a last-minute pile

What to capture

Priority band	Current-affairs categories	Keep this level of detail
A — Must capture	Major government schemes/policies; Union Budget/economy; important national/international events; major awards; major sports events; science/space/defence milestones; key appointments; important reports/indices.	What happened; who/which organisation; date/year; place; ministry/agency; one or two distinguishing facts.
B — Capture selectively	International summits; major bilateral agreements; environment conventions; important books/authors; major cultural awards; notable rankings; important days/themes.	Name + reason for significance + one identifying fact.
C — Low priority unless repeated	Local inaugurations; routine speeches; every minor award; viral social-media items; long lists of statistics without exam linkage.	Skip unless it has national significance or appears in PYQs / trusted exam analysis.

A reliable current-affairs note format

Date | Category | Event | Person / Ministry / Organisation | Place | One distinguishing fact | Static link | Source URL | MCQ made from it | D+1 / D+7 / D+30 review status.

11. Current-affairs categories: complete checklist

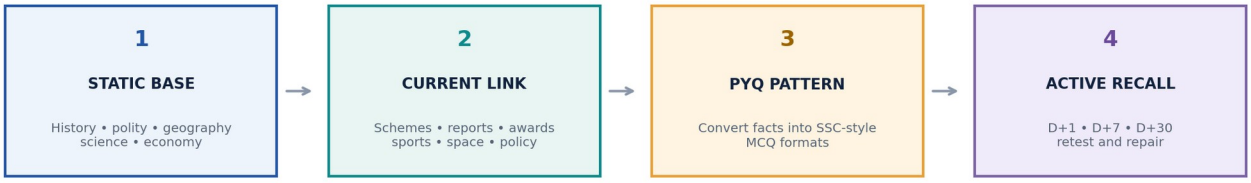

Category	What to track	Cross-link to static GK
Government and policies	Cabinet-approved schemes, programme changes, major bills/acts, ministry announcements and flagship initiatives.	Polity, governance, economy, ministries.
Economy and finance	Budget, Economic Survey, monetary policy, inflation, major indices and significant institutional reports.	Economic terms, RBI, taxation, institutions.
Science, space and technology	Space missions, research milestones, major launches, health/science breakthroughs, technology initiatives.	Physics, biology, space agencies, satellites.
Sports	Major tournament winners, host locations, Indian milestones, major trophies, records and official awards.	Geography, sports terms, current events.
Awards and honours	Major Indian/international awards, recipient, field, organisation and year.	Literature, science, peace, arts, public service.
Appointments and institutions	Important national offices, major international organisations, chairpersons/heads when genuinely significant.	Polity, organisations, headquarters, mandate.
Reports and indices	Publisher/agency, subject measured, India's relevant finding or rank when needed, release cycle.	Economy, health, environment, development.
Environment and disasters	Major protected-area updates, species/conservation, climate commitments, severe national-level events.	Ecology, geography, climate and conventions.
Books, culture and important days	Notable books/authors, major cultural festivals, important observances and announced themes.	Art/culture, heritage, literature, institutions.

Current-affairs fact quality test

- Can I verify it through an official or authoritative source?
- Can I state the fact in one sentence without ambiguity?
- Can I identify the "who / what / where / when" correctly?
- Does it connect to an SSC topic or have national-level significance?
- Can I create a fair MCQ from it without relying on rumour or speculation?

12. The smart integration model: static + current + PYQ

The repeatable GK learning engine

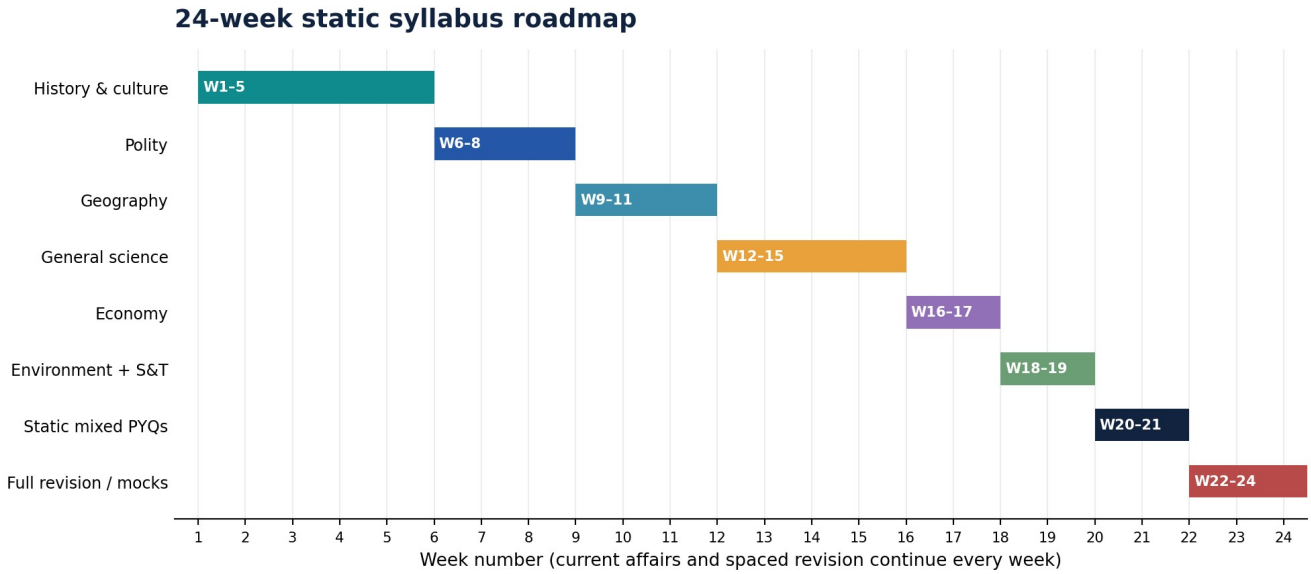

Example theme	Static foundation to learn	Current-affairs connection	PYQ-style retrieval
RBI / monetary policy	RBI role, inflation, repo and banking terms.	Major policy decision or official announcement.	Which institution / tool / objective?
Space mission	Satellite, launch vehicle, orbit and space agency basics.	Mission name, purpose, launch agency and milestone.	Match mission -> purpose / vehicle.
Government scheme	Policy, ministries and constitutional / administrative basics.	Objective, target group, launch / revision details.	Identify ministry, beneficiary or purpose.
Wetland / national park	State location, ecology, river basin, species.	New recognition / important update.	Match site -> state / category / species.
Sports event	Tournament format, sport and governing body.	Winner, host, Indian medal / record where relevant.	Match event -> venue / trophy / winner.
Report / index	Indicator definition and publishing organisation.	Most important finding linked to India.	Publisher -> index / theme / indicator.

Why this improves recall

A standalone fact has few memory hooks. A fact attached to a static concept, map location, institution or PYQ pattern is easier to retrieve and less likely to be confused with similar facts.

13. Twenty-four-week master roadmap

Use the roadmap as the first pass of static GK. Current affairs, active recall and short PYQ sets continue from Week 1 to Week 24; do not postpone current affairs to the end.

Weeks	Main static focus	Output / assessment
1–2	Baseline test; ancient India; historical timeline foundations.	Baseline topic accuracy; timeline cards; first PYQ set.
3–5	Medieval + modern history; reform movements; culture.	History revision sheet; culture-state pairs; chapter tests.
6–8	Constitution, rights/duties, Parliament, executive, judiciary, bodies and local government.	Polity comparison tables; weekly 25-question quiz.
9–11	Physical, Indian and world geography; maps; resources and climate.	Two map drills per week; state-river-park links.
12–15	Physics, chemistry, biology, everyday science and health.	Concept -> application flashcards; spaced quizzes.
16–17	Economy, banking, inflation, budget, public finance and institutions.	Economy glossary; one-line current links.
18–19	Environment, ecology, science/technology and selected static GK.	Topic checklist complete; mixed science/ecology quiz.
20–21	Mixed PYQs across all static chapters; identify forgotten facts.	Tag each miss; create short repair lists.
22–24	Full revision cycles, timed GA sets, current affairs consolidation and mocks.	Weekly mock; weak-topic repair; final fact audit.

14. Daily and weekly operating system

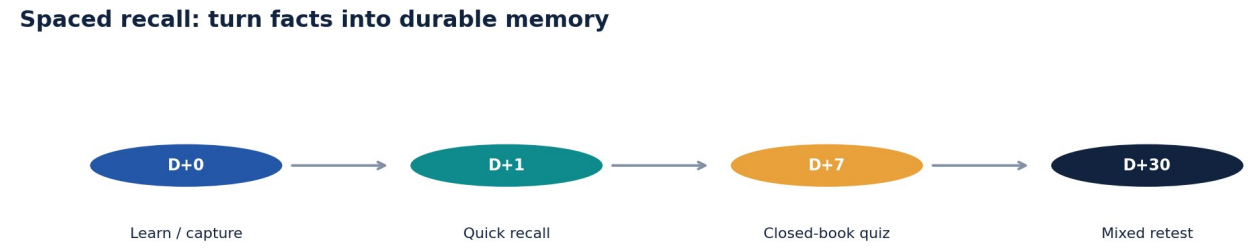

Daily GK + Current Affairs block (45 minutes)

Minutes	Task	How to do it
20 min	Static GK	One small subtopic; learn and explain it in simple words.
10 min	Current affairs	Read a curated summary or official update; capture only exam-relevant facts.
10 min	Active recall	Close the notes and answer yesterday's cards / short quiz.
5 min	PYQ + error log	Solve 3–5 old questions or record why a recent answer was wrong.

Weekly routine

- One timed 25-question GA set under a 15-minute Tier-I timer, followed by full review.
- One 45–60 minute static-GK consolidation session across older topics.
- One current-affairs weekly recap: 20–30 important fact cards; remove duplicate/low-value notes.
- One geography map quiz or science / polity fact quiz based on the week's weakest area.
- Update the error log: fact forgotten, two options confused, question misread, or source conflict.

Spaced-revision loop

Do not count rereading as mastery. Use closed-book questions at each revision interval. If an answer is wrong at D+7, return it to the short revision queue.

15. Mastery gates and score management

Gate	Recommended standard	Move forward when…
Gate 1: Understand	Explain the concept or fact cluster without reading.	You can explain it in one or two simple sentences.
Gate 2: Retain	At least 80–85% on a fresh short quiz after a delay.	You recall facts after several days, not only immediately after reading.
Gate 3: PYQ transfer	At least 80–85% on a topic-wise authentic PYQ set.	You recognise the way SSC tests the concept; every wrong item is reviewed.
Gate 4: Mixed retrieval	At least 80% on mixed-topic tests without topic labels.	You can identify the relevant subject even when questions are shuffled.
Gate 5: Timed execution	Progressively target 20–23+ correct of 25 GA questions in 15 minutes.	You balance speed and accuracy; this is a stretch target, not a cutoff guarantee.

Score formula

Tier-I GA: score = 2 × correct answers − 0.5 × incorrect answers. Tier-II GA: score = 3 × correct answers − 1 × incorrect answers under the 2026 scheme. Unattempted questions score zero. Confirm the applicable notification before the exam.

Mistake tags

Tag	Meaning	Repair action
F	Forgotten fact	Make a concise flashcard; review D+1 / D+7 / D+30.
C	Confused two similar items	Build a comparison table: person vs work, scheme vs ministry, site vs state.
S	Source conflict / unclear wording	Verify through an official or authoritative primary source.
R	Read the question incorrectly	Underline dates, “not”, “incorrect”, “first”, “largest” and category cues.
G	Guess without recall	Record the topic and create a two-question retrieval drill.

16. Curated resource stack: keep it small and reliable

Use one primary teaching source, one authentic PYQ source and a handful of official sources for current-affairs verification. More sources are not automatically better; duplicate notes consume revision time.

Purpose	Recommended source	How to use it
Official syllabus / pattern	SSC CGL 2026 notification: https://ssc.gov.in/api/attachment/uploads/masterData/NoticeBoards/Notice_of_adv_cgl_2026.pdf	Check the live notice for your cycle; treat it as the authority for exam scope and marking.
Free static GK video revision	Parmar SSC Free Revision Batch 2.0 / GK PYQ series: https://www.youtube.com/watch?v=B6_yag9NKkM	Use as a main chapter/revision route. Watch with a topic checklist and practise questions after every lesson.
School-level static concepts	NCERT ePathshala textbooks: https://epathshala.nic.in/wp-content/doc/book/btextbook/textbook.htm	Repair weak history, geography and science fundamentals. Do not read every textbook cover-to-cover.
Government programmes / national updates	Press Information Bureau: https://www.pib.gov.in/indexm.aspx?lang=1&reg=3	Schemes, Cabinet decisions, ministry announcements, explainers, year-end reviews.
Policy / legislation summary	PRS Monthly Policy Review: https://prsindia.org/policy/monthly-policy-review	Bills, parliamentary developments and important policy context. Use for selection, not as an extra daily news feed.
Space and science milestones	ISRO launch missions: https://www.isro.gov.in/LaunchMissions.html	Verify mission names, launch dates, payloads and official mission descriptions.
RBI / monetary and banking updates	Reserve Bank of India: https://www.rbi.org.in/	Use for policy rates, official releases, payment / banking system updates and reports.
Authentic paper practice	SSC official website: https://ssc.gov.in/	Prefer official question papers/response sheets and final answer keys wherever available.

Do not use an aggregator as the final authority

Coaching notes are useful for speed and syllabus filtering. For a date, winner, official position, rate, scheme or mission that could be updated, verify it before memorising.

17. Current-affairs source hierarchy and note template

Source hierarchy

Level	Source type	Use
1 — Primary	SSC notice; PIB / ministry release; RBI; ISRO; official awards / sports bodies; budget and government documents.	Confirm factual details and dates.
2 — Expert summary	PRS Monthly Policy Review; well-edited exam analysis; trusted educator explanations.	Understand context and filter facts.
3 — Practice / recall	Question banks, daily quizzes, magazine MCQs and mocks.	Test retrieval and expose gaps; verify disputed answers.

Reusable current-affairs record

Field	Your note
Date / month	_____
Category	_____
What happened (one sentence)	_____
Person / organisation / ministry	_____
Place / year / distinguishing detail	_____
Static GK connection	_____
Verified source URL	_____
Question I can answer from memory	_____
D+1 / D+7 / D+30 status	_____

18. Reusable syllabus tracker

Mark a topic complete only after you can recall key facts without notes, solve authentic PYQs and pass a delayed quiz. “Video watched” is not a mastery state.

Area	Topic	Learned	Quiz	PYQs	Revised
History	Ancient India	☐	☐	☐	☐
History	Medieval India	☐	☐	☐	☐
History	Modern India & freedom struggle	☐	☐	☐	☐
Art & culture	Dance, music, instruments, festivals	☐	☐	☐	☐
Art & culture	Architecture, paintings, literature, heritage	☐	☐	☐	☐
Polity	Constitution, Preamble, rights, duties, DPSP	☐	☐	☐	☐
Polity	Union/state government, Parliament, judiciary	☐	☐	☐	☐
Polity	Bodies, schedules, amendments, local government	☐	☐	☐	☐
Geography	Physical geography and world map	☐	☐	☐	☐
Geography	India: rivers, climate, soils, resources	☐	☐	☐	☐
Geography	Agriculture, industries, protected areas	☐	☐	☐	☐
Science	Physics and everyday applications	☐	☐	☐	☐
Science	Chemistry, matter and daily life	☐	☐	☐	☐
Science	Biology, human body, health	☐	☐	☐	☐
Environment	Ecology, biodiversity, conservation	☐	☐	☐	☐
Economy	Basic indicators and national income	☐	☐	☐	☐
Economy	Banking, RBI, inflation, budget, taxation	☐	☐	☐	☐
Current affairs	Schemes and public policy	☐	☐	☐	☐
Current affairs	Appointments, awards and important days	☐	☐	☐	☐
Current affairs	Sports, reports/indices and organisations	☐	☐	☐	☐
Current affairs	Space, science/technology and environment	☐	☐	☐	☐
Revision	Mixed PYQ sets and mock analysis	☐	☐	☐	☐

Tip: in the Word version, replace boxes with a check mark or enter dates. In the PDF, print this page and mark by hand.

19. Final operating rules and references

Five rules to keep preparation effective

1. Static GK is a base, not a one-time task. Schedule it repeatedly.
2. Current affairs starts on Day 1 and runs alongside static subjects; it is not a last-month subject.
3. Use official primary sources for facts that can change. Use teachers and summaries for speed.
4. Practise questions in mixed order. This trains recognition rather than chapter-name dependence.
5. Every mock must produce an error-repair list. Repeating mocks without reviewing mistakes is low-value work.

Final reminder

This master syllabus is an evidence-informed study design. No topic-frequency chart or study plan can guarantee a top-10 rank. Use it to allocate time intelligently, test retention, repair weaknesses and stay aligned with the official SSC notification for your examination cycle.
